

## Lab Sheet 2

### 1. Follow the steps below to create a simple ASP.NET page.

--Start Menu

--Microsoft Visual Studio 2010

--New Web Site

--Empty Web Site /ASP.NET Empty Web Site (Installed Templates: Visual Basic, Web Location: File System, you can change the location to other folder by using Browse button)

--Right-click the website name in the Solution Explorer and choose the Add new Item menu option.

--Choose Web Form item and click Add button (An ASP.NET page named Default.aspx is added, there are three views)

--From the Source View, add the following text between the <div> and </div> tags:

```
<h1> Hello, ASP.NET!</h1>
```

--Go to the Solution Explorer, right-click Default.aspx, and choose the View in Browser menu option (This starts the ASP.NET Development Web Server and launches your computer's default browser).

### 2. Based on lab sheet 1, create an ASP.NET page to calculate BMI.

### 3. Based on lab sheet 1, create an ASP.NET page to implement Guess Number game.
